

Organised by:

A VERSATILE APPROACH USING GLASS IONOMER CEMENTS IN COMPLEX CASES WITH IMPROVED PATIENT'S OUTCOME

SPEAKER:

Michael A Schneider D.M.D.

 4th March, 2023 (Saturday)

 10am-11am (SGT)

***FREE Registration**

SYNOPSIS:

Glass ionomer cements have been widely used for many years. This webinar will highlight a hybrid, resin modified glass ionomer with unique characteristics of being hydrophilic and biocompatible with soft tissue. We will review case studies to treat perforations, restore a tooth with a split root, and even PDL attachments for subgingival restorations, amongst other uses that will be discussed.

Biography

Dr Michael Schneider received his B.A. in Economics from the University of California San Diego, after college he went on to his dental training receiving his DMD in 1987 from Tufts University School of Dental Medicine, after graduation Dr Schneider returned home to California where he took over a prosthodontic practice in Westwood. Westwood is adjacent to Beverly Hills. The dental practice specialized in complex and technologically advanced reconstructions. While maintaining a busy practice Dr Schneider made time to be a Professor in the department of Restorative Dentistry at Tufts and an adjunct clinical professor at the University of Southern California School of dentistry, both faculty appointments are active even today. In 2004 Dr Schneider was asked to demonstrate Lumineers placement on the evening news so helping to launch minimally invasive cosmetic dentistry to California and the world. Today Dr Schneider maintains a busy restorative practice emphasizing minimally invasive cosmetic dentistry, he has lectured on Lumineers and other aspects of minimally invasive cosmetic dentistry since 2006 training dentists from China to Europe and the Middle East, with all points in between.
